Tracking Solutions

ProteGear 4-in-1

How it works - simple is safe

0 First Setup.

Alarm scenarios and safety areas are being setup by a click, and alarm endpoints for SMS, Email, Rest-API or RescueNavigation are being configured before the first start. **SmartSafety** profiles for different sports are already available: for mountainbiking, windsurfing, kiteboarding, climbing, mountain hiking, sailing, skiing, snowboarding, lone-workers, hunter. Customized profiles are also available.

1 Turn on the Tracker.

Activate Tracking and take the device with you. The safety surveillance starts automatically by using "AutoSessions". The battery will last several days, however please charge every night (GSM is inductive)

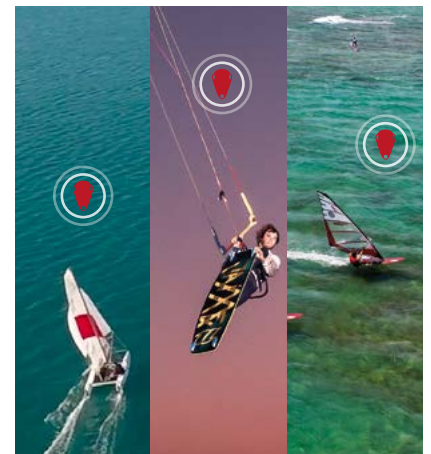

GSM/3G
IP67 waterproof
inductive charge

or

Iridium-Satellite
IP67 waterproof
USB charge

2 Stay connected. Stay safe.

The automatic dead-man switch monitors you in the background and checks if you are still "moving" normally, within the geofence etc or if you crash. In addition you can always trigger a manual SOS or a semi-automatic emergency call triggered by an avalanche airbag system for example.

SmartSafety + Tracking

Real-Time Monitoring
Automatic Warnings

You don't need to be online!

ProteGear Smart Safety sends automatic warnings on your mobile (by SMS) and email with safety zones, preconfigured routes or customized alarm-scenarios.

Statistics for each session

Top left you can see the statistics of the current or historic sessions, with distance, speed, altitudes and much more. Replay included

Status of each session/user

Top right lists all current sessions and its current status, alarms and last messages
Initiates rescue navigation too

Current position of monitoring device

Activation
Activate or deactivate each device individually

Pin | Status

-   All fine!
-   Tracking has been paused on purpose or device re-entered pause-zone
-   Pre-Warning. Fence left, First Signal lost, Battery Low or Crash
-   Automatic or Manual SOS. Help needed!

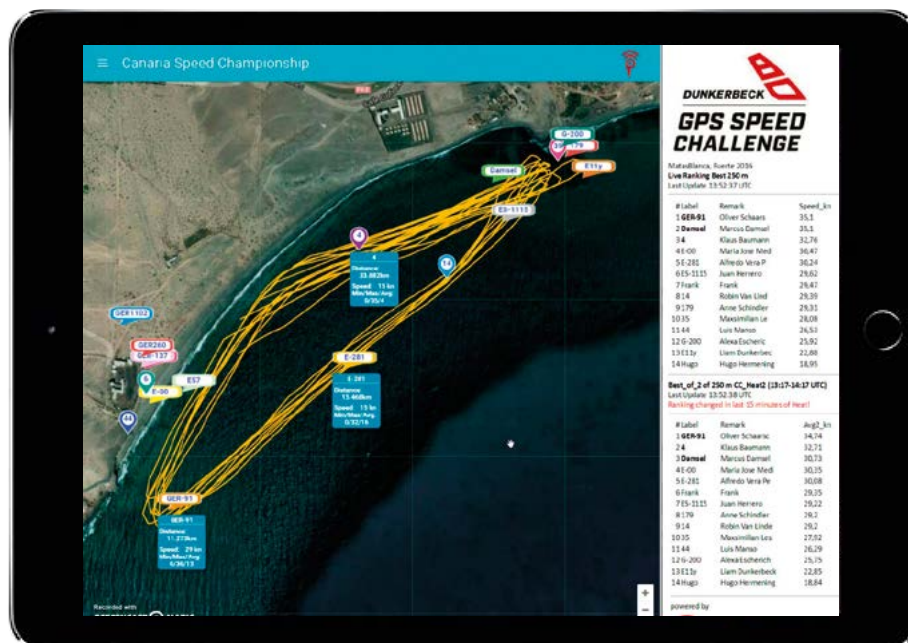

Community & Competition

Daily Challenges with LiveRanking

See and rank how fast they are!
For big competitions and daily challenges
Easy to include in your own webpage!
